WORLD HUMANITARIAN DRIVE FOUNDER CHAIRMAN'S MESSAGE

We are proudly inviting the world to our initiated event "The Science Bazaar"

Science has conferred many gifts on modern life; indeed they are far too many to be counted. I say the gift of human is great to be innovative for the benefit of humanity.

The idea of The Science Bazaar is to have a bazaar of technological inventions of up to 1000 new innovative solutions to promote, recognise and develop deserving unknown individual talents in this world.

The science bazaar will surely be a great platform for individuals and we welcome global applicants, partners, and participants from all the 7 continents through an online application to participate and to present their innovations to the world.

WHD is aiming to get support from the participating global leaders and investors to successfully promote, market, and patent the new innovations and ideas of the participants in the science bazaar, which will make the future world beautiful.

We welcome partnerships for bringing new innovations to the science bazaar to ensure the happiness of humanity.

Participants have the opportunity to have huge global recognitions, patent and investment support, mentoring, networking and media support, WHD will also present the deserving participants with "International Awards" The motto of the science bazaar is "innovation inclines" hence I say, "I love this idea of humanity thinking equal, building a smart world with technology and innovations for betterment of humanity."
