Dear Sir/Madam

Sub: Letter of Support for Museum/Memorial Status for 10 King Henry's Road, London

We write to fully support the above application where Dr Ambedkar lived from 1921 to 1922.

He was a social reformer and politician who achieved so much in his life and is revered around the globe on many levels. He stood for equality of society, and his thoughts, actions and extensive writing were way head of his time in the UK and in India.

The King Henry house is a great reminder for the generations of children of today and tomorrow, of what can be achieved when faced with inequities. The museum/memorial status will give inspiration to many visitors across all cultures for many years to come.
